

INSTRUCTIONS

BIOZORB Vehicle Spill Kit

1. Unpack carry bag spill kit and lay out contents away from direct contact with spill.
2. When dealing with a spill, first open the Biozorb ®™ and sprinkle directly onto spill. Cover the entire surface area with a thin layer Biozorb ®™.
3. Biozorb ®™ will change to a black colour. It should have the consistency of used coffee grounds. Once it has reached this state (almost instantly) sweep up with a sparkproof brush into dust pan, place into disposal bags and close with ties. If oil / hydrocarbon spill has spread, place a sock around spill, if required you can sprinkle Biozorb ®™ on spill once you have contained the spill with booms.
4. Once you have completed the clean-up place all saturated Biozorb ®™ as well, other soiled product in disposal bags and seal with the ties as provided.
5. **REMEMBER TO REPLACE USED STOCK FROM KIT**
Herewith the list of contents for your convenience.
